DETAILED ACTION

Claim Objections

1. Claim 17 is objected to because of the following informalities: in the claim 17, line 11, "second" should be deleted, because there was no "first" conductive layer being claims.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 17 is rejected under 35 U.S.C. 102(b) as being anticipated by Clark et al. (5,098,853).

Clark et al. (5,098,853) discloses a method of making a HBT having the steps of :

Preparing a substrate 2 which has a collector 8, a base (6, 10), and an emitter (4,) are formed in sequentially;

Removing the emitter layer 4 to expose a part of the base layer 10 ; and

forming a conductive layer 32 serving as a base electrode by using a photoresist mask 48 as a mask. See figure 7-8 and col. 5, lines 35-65.

Allowable Subject Matter

3. Claim 16 is allowed.

Art Unit: 2814

4. The following is an examiner's statement of reasons for allowance: the prior art of record does not disclose or fairly suggest a method having the steps of patterning a first conductive layer to form an emitter electrode and forming a dummy electrode so as to be separated from the emitter electrode; removing the emitter layer using the emitter electrode and the dummy electrode as a mask, forming a second conductive layer, and other steps in the claims.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

1. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Streit et al. (5,672,522), Hill (5,298,438), and Streit et al. (5,162,243), each reference discloses a method of forming a HBT device.

2. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Vikki Trinh whose telephone number is (703) 308-8238. The Examiner can normally be reached Mon-Tuesday, Thurs-Friday, 7:30 AM - 6:00 PM Eastern Time.
